

## COUNTER ROTATING CHAIN CONVEYOR

### COUNTER ROTATING CHAIN CONVEYOR

For simple, effective accumulation of parts, the Counter Rotating Chain Conveyor is the answer. Parts or pallets ride directly on the hardened transporting rollers that are part of the driving chain. These rollers are freewheeling and allow the parts to stop on the conveyor while the chain continues to move under the part or pallet. The hardened transporting rollers simply roll under the stopped part, which allows additional parts to accumulate behind the stopped part, while the chain and hardened roller continue to move.

### AVAILABLE FEATURES

#### Construction:

- Steel Legs
- Aluminum Side Bars

#### Conveyor Drive:

- Electric

#### Escapements:

- Electric or Pneumatic

#### Part Types:

- Cylinder Blocks, Cylinder Heads, or any Flat Part or Pallet

#### Conveyor Length:

- Up to 15 meters (50 feet) per drive

#### Conveyor Speed:

- 150 mm (6 inches) per second. Other speeds available upon request

#### Controls:

- P.C. or your preference

#### Accessory Equipment:

- Orientation Devices, Lift Stations, Rotate Stations, Pushers, Pullers, Shot Pins, Turntables, Swing Gates
