

## INDEXING CONVEYOR

### INDEXING CONVEYOR

If your needs are for a conveyor that will maintain a buffer of parts for your production line, the Indexing Conveyor is just the conveyor for the job. Unlike conventional in-line conveyors, this conveyor's success is due to a bi-directional movement of parts. Upon demand, the conveyor can present either an empty station for loading or a full station for unloading to the production line. High up time and low maintenance makes this unit very cost effective. This conveyor interfaces perfectly with Robot or Gantry Loaders/Unloaders.

### AVAILABLE FEATURES

#### Construction:

- Steel Legs
- Aluminum Side Bars

#### Conveyor Drive:

- Electric

#### Part Types:

- A variety of part types can be handled on this conveyor

#### Conveyor Length:
